Project 1 / Note App

By : Hussein Safaa

Create 3 directories to organize the codes , each with their own classes that have related functions.

1- Models : -Note (responsible for The note charastricticss like ID and colors)

-Database (Your average database class used for managing)

2- Screens : -home (Where Notes are listed , you can delete or edit them)
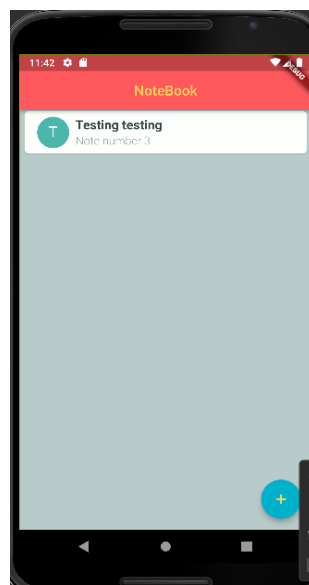

-notes_edit (Write note , change color , delete)

3-theme : - note_colors(saves different colors in a Map to easily be accessed) .

Extras :

a) ColorPaletter (Responsible for managing the note theme color)
b) NoteEntry (Taking input for what you write in note)
c) NoteTitleEnrty (Taking the input for the title)
